All,

Greetings. I have read all I can in the Region view of WebEOC and gleaned much; thanks for pointing me to this location.

My summary: ESF10 is still a secondary mission, primary ESF10 concern is drinking water related. One (or two) mission assignments are possibly being worked on (TX requesting 184 EPA/USCG personnel to support ESF10) [heard through informal channels].

Two reports of possible tank storage compromises: 1) Harris Co – 527 bbls gas 2) Valero in Houston crude oil tank roof failed; leaking into secondary containment area, Valero crews responding.

EPA/USCG have lots of deployed personnel in area and with EOC.

EPA stood up the national EOC in D.C.

If I am missing anything significant, let me know.

Respectfully,
LCDR Matthew Walter, USCG
